

# FORMULARIO RESULTADOS CLÍNICOS

La siguiente es una lista de los fármacos más comúnmente recetados. Representa una versión resumida de la lista de fármacos (lista de medicamentos disponibles) que es el eje de su plan de beneficios para fármacos de venta con receta. Esta lista no es completa y no garantiza la cobertura. Además de usar esta lista, le recomendamos que le pida a su médico que le recete fármacos genéricos siempre que sea apropiado.

**TENGA EN CUENTA LO SIGUIENTE:** Es posible que los medicamentos de marca cambien al estado de "Fuera de Formulario" si durante el año una versión genérica se pone a disposición. No todos los fármacos que aparecen en la lista están cubiertos por todos los programas de beneficios de fármacos recetados; lea su material sobre beneficios para ver qué medicamentos específicos están cubiertos y cuáles son los copagos según su programa de beneficios de medicamentos recetados. Si tiene preguntas específicas sobre su cobertura, llame al número de teléfono que aparece en su tarjeta de identificación de miembros.

† Indica medicamentos de especialidad

**Para el miembro:** Es posible que el diseño específico de su plan de beneficios de medicamentos no cubra determinados productos o categorías, independientemente de que aparezcan en este documento. Puede que los productos recientemente aprobados por la Administración de Medicamentos y Alimentos (FDA, Food and Drug Administration) de los EE. UU. no estén cubiertos tras su lanzamiento al mercado.

WellDyne podrá comunicarse con su proveedor tras recibir una receta para solicitar la consideración de un producto que figura en la lista de fármacos o de un equivalente genérico. Esto puede dar como resultado que su proveedor recete, cuando sea clínicamente apropiado, un producto de marca diferente o un equivalente genérico en lugar del producto original. Los medicamentos genéricos contienen los mismos ingredientes activos que los correspondientes medicamentos de marca, aunque pueden ser de color o forma diferente. Han sido aprobados por la FDA, de acuerdo con estrictas normas.

En la mayoría de los casos, cuando un producto genérico se hace disponible, el fármaco de marca correspondiente se designará como no preferido o la opción se excluirá tras el lanzamiento al mercado del producto genérico.

**Para el médico:** Los genéricos deben considerarse primero a la hora de recetar. Recete productos preferidos y permita sustituciones por genéricos cuando sea clínicamente adecuado. Los fármacos de marca se enumeran con letras MAYÚSCULAS, mientras que los genéricos se enumeran en letras minúsculas.

Esta lista de fármacos es un resumen de la cobertura de medicamentos, no incluye todas las opciones posibles y no garantiza la cobertura. Es posible que el diseño específico del plan de beneficios de medicamentos del miembro no cubra determinados productos o categorías, independientemente de que aparezcan en este documento. Puede que los productos recientemente aprobados por la FDA no estén cubiertos tras su lanzamiento al mercado.
