

2023 Specialty Drug List

Specialty medicines treat complex and chronic (long-term) conditions. Examples include multiple sclerosis, hepatitis C, HIV and cancer. Depending on the condition and prescribed therapy, these drugs may be taken by mouth, through a vein, or by injection. Specialty medicines often require specialty handling such as refrigeration. The following specialty medications are covered by WellDyne. This list is not all-inclusive and is subject to change without notice.

A

abacavir sulfate-lamivudine^{QL}
abacavir sulfate^{QL}
abacavir-lamivudine-zidovudine^{QL}
abiraterone acetate^{PA, QL}
ACTHAR^{PA}

Products covered by a member's prescription benefit plan may change from time to time. Preferred brand products are listed in UPPERCASE LETTERS, generic products are listed in lower-cased italics, and other products listed are non-preferred. Specialty medications are covered based on member's benefit plan design, regardless of their appearance on this document. Additionally, medications listed in this document may require prior authorization.

^{PA} = Prior Authorization Required

ST = Step Therapy Required

^{QL} = Quantity Level Required
