

2021 Preventive Drug List

Prescription drugs that can help keep you from developing a health condition are called preventive prescription drugs. They can help you maintain your quality of life and avoid expensive treatment, helping to reduce your overall health care costs. If you are prescribed a preventive prescription drug, you will only pay a percentage of the total cost – right from the beginning.

*Medications in these classes may require prior authorization to determine if they are being used preventatively for coverage at reduced cost for high deductible health plan (HDHP) members.

KEY:

apap = acetaminophen

hctz = hydrochlorothiazide

ER = extended-release

DR = delayed-release

The rights of the drug names appearing on this Preventive Drug List, whether or not appearing in connection with the trademark symbol, belong exclusively to their owners.
